

# ARJUN R

Front-End Developer • UI Architect • Data Visualization Specialist

Alappuzha, Kerala, India • ajuarjunr@gmail.com • +91 8921843248 •  
arjun-portfolio-03.vercel.app • github.com/Arjunrajan250

## PROFESSIONAL SUMMARY

Front-End Developer and UI Architect with **2+ years of professional hands-on experience** specializing in high-performance web applications, modern JavaScript frameworks (Angular, React), and complex telemetry/data visualization architectures (amCharts, Three.js, Highcharts, Sigma.js, Chart.js). Proven track record developing enterprise-grade cybersecurity suites (SIEM, SOAR, UEBA, NDR) and interactive dashboards. Proficient in integrating AI-assisted rapid development workflows with strict zero-leakage enterprise security and data integrity. Rapid tech stack adaptability with complete full-lifecycle website and application delivery expertise.

## CORE COMPETENCIES & TECHNICAL SKILLS

**Front-End Technologies & Frameworks:** JavaScript (ES6+), TypeScript, Angular, React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design, Component-Driven UI.

**Data Visualization & Graphics:** Three.js (WebGL 3D), amCharts 5, Highcharts, Sigma.js (Graph Networks), Chart.js, D3.js, Leaflet.js (GIS/Geospatial).

**State Management & Architecture:** RxJS Reactive Streams, RESTful APIs, State Management, Micro-Frontend Integration, UI Performance Optimization.

**Domain Expertise:** Cybersecurity Operations Center (SOC) Dashboards, SIEM Event Correlation, SOAR Orchestration UI, UEBA Analytics, NDR Network Telemetry, Dark Mode & Accessibility (a11y).

**Developer Tools & Methodologies:** Git, GitHub, Webpack, Vite, Node.js, Express.js, Headless Browser Automation, CI/CD, Agile/Scrum, AI-Assisted Engineering Workflows.

## WORK EXPERIENCE

### Front-End Developer

June 2024 – Present

Innspark Solutions • Kerala, India (Full-Time)

- Front-End Developer working on mission-critical cybersecurity-related projects, including SIEM, SOAR, UEBA, DNS security, and other highly confidential government projects.
- Architected dynamic real-time telemetry dashboards and high-density data visualizations utilizing amCharts, Three.js, Highcharts, Sigma.js, and Chart.js for rapid threat triage.
- Enforced strict zero data-leakage standards, enterprise privacy boundaries, and confidential security protocols across all deliverables.
- Optimized client-side rendering pipelines and state propagation, reducing dashboard load times and boosting performance on high-event-volume streams.

### MERN Stack Developer Intern

July 2023 – January 2024

Techfriar Technologies • Kerala, India (Internship)

- Developed responsive full-stack web applications utilizing React.js, Node.js, Express REST APIs, and MongoDB databases.
- Implemented secure user authentication workflows, JWT token management, and role-based access control (RBAC).

## KEY ENGINEERING PROJECTS

### Enterprise SIEM, SOAR & DNS Security Console

Cybersecurity / SOC Suite

Engineered mission-critical cybersecurity consoles for security operations centers (SOC) and confidential government projects. Triaged multi-source log streams, correlated SIEM alerts, automated SOAR incident playbooks, and visualized DNS security telemetry with strict access boundaries.

### UEBA & NDR Network Telemetry Systems

Behavioral AI / Network Analytics

Built user entity behavioral analytics and network detection dashboards with topological graph network visualizers (Sigma.js) to identify malicious internal lateral movements and abnormal data exfiltration events in real time.

**Cyber Crimes & Threat Intelligence India (IndiaLens)** Open Cyber Defense Platform

Engineered an open interactive cyber defense portal synthesizing national cybercrime stats, 5-stage scam kill-chain visualizers, a heuristic SMS/URL scanner, and national 1930 incident triage workflows with zero external trackers.

**Voice Assist AI for the Visually Impaired** Diploma Capstone Project

Engineered a voice-controlled accessibility system using deep learning and speech synthesis to aid visually impaired individuals with computer navigation and everyday digital tasks.

EDUCATION

**Bachelor of Computer Applications (BCA) — Software Engineering** 2024 — Present  
Amrita AHEAD (Amrita Vishwa Vidyapeetham) • Online Higher Education (Pursuing alongside full-time work)

**Diploma in Computer Engineering** 2021 — 2024  
Carmel Polytechnic College, Alappuzha • First Class with Distinction • Campus Placed at CISAI (Innspark)

CERTIFICATIONS & PROFESSIONAL TRAINING

- Basics of Artificial Intelligence & Machine Learning (AI/ML):** Lekshmi Infotech — Practical training on machine learning algorithms, model evaluation, and Python data preprocessing.
- Fundamentals of Telecommunications & Network Infrastructure:** BSNL (Bharat Sanchar Nigam Limited) — Data transmission architecture, IP protocols, and network routing.
